

2/2-way Angle-Seat Valve with stainless steel design for media up to +180°C, DN 13-50

- High flow rates
- High cycle life
- Flow optimised body in stainless steel
- Deliverable with flow direction below or above seat
- Clean design for optimal use in hygienic environment

Type 2100 can be combined with...

Type 8690

Pneum. control unit with feedback

Type 8691

Control head

Type 8695

Control head

Type 8645

Automation system FreeLINE

Type 8222

Conductivity transmitter

In line with Bürkert's philosophy for modular valves and sensors the construction of the 2100 angle-seat valve fulfils tough criteria for process environments. Unrivalled cycle life and sealing integrity is guaranteed by the proven self adjusting packing gland.

The design enables the easy integration of automation modules whether they are electrical/optical position feedback, pneumatic control units, an integrated fieldbus interface or even an explosion proof feedback.

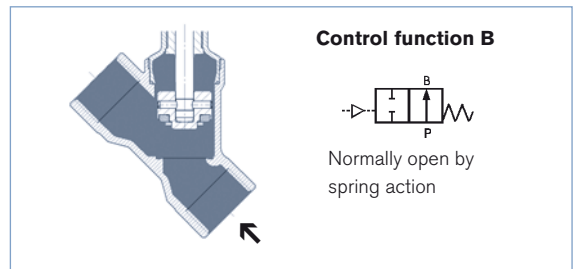

The fully integrated system has a compact and smooth design, integrated pneumatic lines, IP65/67/NEMA4X protection class and superior chemical resistance.

Technical data	
Orifice	DN 13 to 50
Port connections	G 1/2 to G 2, NPT 1/2 to NPT 2, Rc 1/2 to Rc 2 EN ISO 1127, DIN 11850 S2, ASME BPE, SMS 3008, BS 4825 ISO 2852, ASME BPE
Threaded port acc. to Welded acc. to	
Clamp acc. to	
Body material	Casted stainless steel 316L
Threaded port body	
Welded body	Stainless steel 1.4581 (316L on request)
-EN ISO 1127/ISO 4200 and DIN 11850 Serie 2	
-ASME BPE, SMS 3008, BS 4825 Part 1	
Clamp body	Stainless steel 316L Stainless steel 316L
Actuator material	
Actuator	PPS
Cover	Stainless steel 1.4561 (316Ti)
Sealing material	PTFE
Media	Water, alcohol, oils, fuels, hydraulic fluids, salt solution, alkali solutions, organic solvents, steam
Viscosity	max. 600 mm ² /s
Packing gland	PTFE V-rings with spring compensation
Media temperature	-10 to +180 °C
Ambient temperature	0 to +60 °C
Control medium	Neutral gases, air
Max. pilot pressure	max. 10 bar
Pilot air ports	Push-in connector for ø 6/4 mm hose, thread G1/8 (on request)
Installation	As required, preferably with actuator in upright position

Technical data angle seat valve Type 2100 flow direction above the seat (for gases and steam)

Attention!

Valves with flow above the seat are only conditionally usable for liquid media. There is a danger of waterhammer!

Ordering information for valve system On/Off Type 8801-YE

A valve system On/Off Type 8801-YE consists of an angle seat valve Type 2100 and a pneumatic control unit Type 8690, control head Type 8691 (for valve actuator sizes $\varnothing 70/\varnothing 90$ mm) or control head Type 8695 (for valve actuator size $\varnothing 50$ mm) (see separate datasheets).

For the configuration of further valve systems please use the "Request for quotation" on p. 22 [go to page](#)

You order two components and receive a complete assembled and certified valve.

Ordering the valve system On/Off Type 8801-YE with valve actuator sizes $\varnothing 70 / \varnothing 90$ mm

Angle seat valve Type 2100 with actuator sizes $\varnothing 70 / \varnothing 90$ mm

Pneumatic control unit Type 8690

More info.

The new generation of integrated controllers for combination with actuators from the process valve series Type 21xx is specially designed for the requirements of hygienic process environments. The pneumatic control unit Type 8690 combines electrical position feedback and pneumatic control for single or double-acting actuators, and is also optionally available as an intrinsically safe model to ATEX.

Main customer benefits:

- Compact design of the valve system with integrated controller meets the demands for plant washdown environments through the selection of materials, external seals and integrated control air supply to the actuator.
- Integrated pilot valve with manual actuation
- Air intake filter enhances the process valve system availability
- Simple and reliable actuator adaptations allowing additional actuators of the process valve series, Type 20xx or actuators from other manufacturers to be used

Control head Type 8691

More info.

The new generation of integrated control heads for combination with actuators from the process valve series Type 21xx is specially designed for the requirements of hygienic process environments. The intelligent control head, Type 8691, detects the valve position by means of a contact-free analog position sensor circumventing excessive wear of mechanical parts. Single or double-acting actuators are controlled via the integral pilot valve. Communication interfaces AS-Interface and DeviceNet are available as options.

Main customer benefits:

- Compact, hygienic design of the valve system with integrated controller meets the demands of plant washdown environments through the selection of materials, external seals and integrated control air supply to the actuator.
- Automatic setting of the control head at the push of a button
- Even under dirty or dark environments, a clearly visible status display due to powerful LEDs
- Monitoring and diagnosis: Process valve systems with field bus interface used in modern plant processes
- Integrated pilot valve with manual actuation
- Air intake filter enhances the process valve system availability
- Simple and reliable actuator adaptations allowing additional actuators of the process valve series, Type 20xx or actuators from other manufacturers to be used

Ordering information for valve system On/Off Type 8801-YE, *continued*

A valve system On/Off Type 8801-YE consists of an angle seat valve Type 2100 and a pneumatic control unit Type 8690, control head Type 8691 (for valve actuator sizes $\varnothing 70/\varnothing 90\text{mm}$) or control head Type 8695 (for valve actuator size $\varnothing 50\text{ mm}$) (see separate datasheets).

For the configuration of further valve systems please use the "Request for quotation" on p. 22 [go to page](#)

You order two components and receive a complete assembled and certified valve.

Click on the orange box "More info." below... you will come to our website for the resp. product where you can download the datasheet.

Control head Type 8695

More info.

The new generation of integrated control heads for combination with small actuators from the process valve series Type 21xx is specially designed for the requirements of hygienic process environments. The intelligent control head, Type 8695, detects the valve position by means of a contact-free analog position sensor circumventing excessive wear of mechanical parts. Single and double-acting actuators are controlled via the integral pilot valve. An AS-Interface communication interface is available as an option.

Main customer benefits:

- Compact, hygienic design of the valve system with integrated controller meets the demands of plant washdown environments through the selection of materials, external seals and integrated control air supply to the actuator
- Automatic setting of the control head at the push of a button
- Visual status display on the control head
- Monitoring and diagnosis: Process valve systems with fieldbus interface used in modern plant processes
- Integrated pilot valve
- Simple and reliable actuator adaption

Operating data

Pipe line DN PN

Pipe material

Process medium

Type of media Liquid Steam Gas

Valve features

Seal material PTFE NBR Other

Nominal pressure PN

Orifice DN

Type of connection Threaded Welded Clamp

Standard connection ISO DIN Other

Body material selection with welded connection, acc. to EN ISO 1127/ISO 4200 and DIN 11850 St. st. 1.4581 St. st. 316 L

Control function NC¹⁾ NO¹⁾ Double-acting

Pilot pressure min. max.

Please specify item no. if known:

¹⁾ NC: normally closed by spring action; NO: normally open by spring action
